CODE SREIES

Project case

Club/ Bar

The whole bar is divided into six functional areas, including DJ station, stage, water bar, scattered seating area, booth area, and leading stage. The height of the slow roll bar is about 5 meters. In order to ensure sufficient brightness, ensure the entertainment lighting in every corner and the performing arts lighting of the stage, we use high-power LED lamps as basic paving lamps. The computer moving light, laser light, dyeing lamp, moving light speed light, strobe light, etc. are used as effect lamps, and the smoke machine is used as special effect equipment.

Outdoor Music Events

Jiechuang lighting supply a full set of outdoor performance stage lighting equipment, which lasted for two and a half months, detailed communication of customer needs, site drawing analysis, the desired lighting effect, the installation and debugging programming of the outdoor performance stage lighting effect after the arrival of the light, shock, beam, cool.

MODEL SHOW

With the development of lighting industry, more and more scenes are equipped with a new era of professional lighting; Lighting is often called by the creator to shape the soul of the stage space, any object can only be perfectly displayed under the irradiation of the light, and the endless lighting effect.

Project Case

Lighting Project

Overall lighting + landscape scenery, screening in line with their own tonality elements to create an outdoor landscape atmosphere, the clever use of light scenery to form two different scenes during the day and night, to increase the depth of the experience, bring visitors a double feeling.
